

Thank you APHN for the opportunity to attend this international conference

1. Write a brief introduction about yourself

I am a palliative care physician practicing in a charitable cancer hospital in India.

2. I attended the session on developing evidence for palliative care – listened to the APPROACH study and listened to Dr Masa, Dr Jane Philips and the nurse researcher from Taiwan

I also attended the serious conversations sessions and session on dyspnea, collaboration for research, quality in palliative care

3. What you have learnt

I learnt about possible future research ideas from the papers.

I am the organizing secretary of the next IAPC conference ;IAPCONjaipur2022

and have taken a lot of ideas from here for our conference

4. How would you use the knowledge that you have learnt?

I have taken ideas for research .

Have been exposed to more evidence to support what I was already practicing

The session on breathlessness with Brennan and Diana Ferreira

Recommendations; JCO/ASCO(2021)

Hierarchical approach to dyspnea

- ① Routine dyspnea screening
- ② Further assessment
- ③ Treatment of underlying causes(s)
- ④ Specialist palliative care referral
- ⑤ **Nonpharmacologic measures**
- ⑥ Pharmacologic measures

ASCO AMERICAN SOCIETY OF CLINICAL ONCOLOGY

Hui D, et al. J Clin Oncol. 2021;39(12):1389-1411.

I have also made contact with people here for future networking : Dr Tushti Bharadwaj ,

My plan for our own international conference was influenced with the exposure to this conference

I appreciate the way all the conference proceedings were available in text as well

5. Write a testimony for future bursary recipients

This is a wonderful conference to share your own ideas and learn from others in the field

This is one way to learn about new drugs and techniques

Learn how to conduct research

Collaborate with other researchers for a multicentric trial – like APPROACH

Also learn how to present from masters in presentation

Our Concept : Palliative care delivery model like a convenience store 6

 <ul style="list-style-type: none">High quality serviceHard to get a reservationMust have referralsToo many rulesOnly top chefs are allowed to cookFew customers per day	 <ul style="list-style-type: none">Service is standardAnytime availableAnyone availableWorkers are diverseMany customers per day
